HURRICANE IMPACT

WINDOW SYSTEMS

WAUSAU

WINDOW AND WALL
SYSTEMS

ENHANCED PROTECTION FOR
ESSENTIAL FACILITIES CALLS FOR
HURRICANE IMPACT-TESTED WINDOW
PRODUCTS MEETING THE MOST STRINGENT
PERFORMANCE REQUIREMENTS.

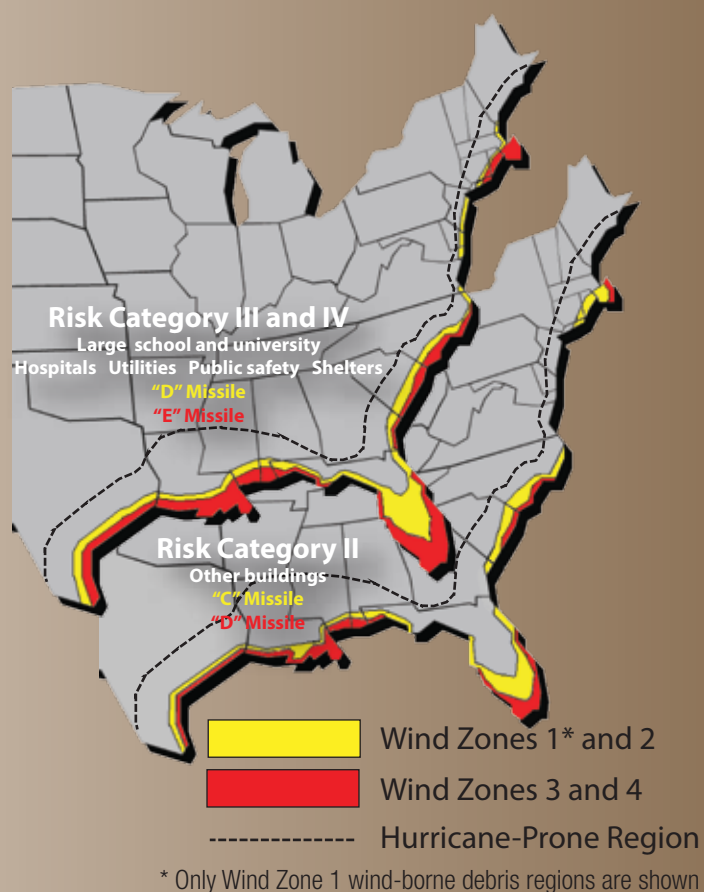

WAUSAU WINDOW AND WALL SYSTEMS' INVENT™ 3250I-HP-XLT, 4250I-HP-XLT AND 3250-HP SERIES CASEMENT, PROJECTED AND FIXED WINDOWS RISE TO THE CHALLENGE, AND ARE OFFERED WITH A BROAD RANGE OF TEST-PROVEN OPTIONS AND ACCESSORIES.

WHETHER THE DESIGN GOAL IS BASIC CODE COMPLIANCE OR A HIGHER LEVEL OF PROTECTION FOR PROPERTY AND OCCUPANTS, WAUSAU'S HURRICANE IMPACT WINDOWS ANSWER THE CALL.

The most current 2010 edition of the American Society of Civil Engineers ASCE-7 "Design Loads for Buildings and Other Structures," in conjunction with the International Building Code IBC-2012, establish design wind speeds for all building types. The schematic maps at right show the extent of hurricane-impact requirements cited in IBC-2012. Be sure to check local code and project specifications for requirements applicable to any particular site or project - and verify whether additional protection may be warranted.

Wausau products are "large missile" tested to comply with requirements both below and above 30 feet, without non-uniformity in glass appearance that can result from the use of different "small missile" glass. "D" missile impact uses a nine-pound, 2x4-inch stud fired at 50 feet per second. "E" missile impact increases velocity to 80 feet per second. Impacts are followed by cyclical pressure testing.

All testing is conducted in compliance with stringent Miami-Dade TAS protocols, and Wausau window products carry Miami-Dade Notices of Acceptance (NOAs), Florida Product Approvals, and Texas Department of Insurance (TDI) listings.

INVENT 3250I- AND 4250I-HP -XLT

HURRICANE IMPACT RESISTANT FIXED AND OPERABLE WINDOWS

- 3-7/8" (3250i) and 4-7/8" (4250i) frame depth
- 24mm XLT polyamide thermal barrier
- AAMA AW-100 Architectural Performance Class
- Fixed, project-in or project-out casement, project-out awning or project-in hopper
- Integral blinds with access doors available
- 0.125" extrusion wall thickness
- Conventional hardware or multi-lock option
- Large "D" missile impact tested for basic protection in Wind Zones 1-4
- "E" missile impact tested for essential facilities' enhanced protection in Wind Zones 3-4
- Tested with receptors and steel strap anchors to address varying substrate configurations

BETWEEN-GLASS BLINDS

LOW MAINTENANCE AND GLARE CONTROL

- Available with 1" or 5/8" aluminum slats in 16 standard colors
- Occupant privacy and glare-reduction tilt control with slip-clutch feature
- Concealed raise-lower cords for uniform exterior appearance
- Hinged interior doors for custodial access
- Triple-glazed options for control of solar heat gain

WINDOW HARDWARE

FOR OCCUPANT OR CUSTODIAL OPERATION - DURABLE AND ATTRACTIVE DESIGNS

Allowable Air	Water	NFRC U-Factor	CRF _f	STC
0.10 cfm/sqft at 6.24 psf	15 psf	0.34 to 0.64 BTU/hr.sqft.°F	46 to 65	31 to 42

Test results may vary - Thermal and acoustical performance cited with non-hurricane-impact resistant glass.

Between-Glass Blinds	5/8" or 1" blinds	5/8" or 1" blinds
*Risk Category II buildings require only C missile protection in Wind Zones 1 and 2. **Roto operators, grid muntins and beveled glazing rebates are not available on Invent HP-XLT Series windows		

Invent windows may be finished in dual colors to match the building's interior and exterior design, with a color palette of more than 30,000 choices.

Finishes may be requested with liquid paints composed of up to 100% post-industrial waste, or powder paint and anodize finishes specified as VOC-free coatings.

Production line sampling, with inspection and water testing prior to shipment, helps ensure real-world performance equal to the laboratory.

3250-HP SERIES HURRICANE WINDOWS

Wausau's AAMA AW-120 rated 3250-HP Hurricane windows have been the product of choice for dozens of hospitals in hurricane-prone regions, and are Miami Dade Product Control Approved:

- Fixed window, large missile
Notice of Acceptance (NOA) #12-0416.07
Miami-Dade County, Florida, 25Apr17
- Fixed window, small missile
Notice of Acceptance (NOA) #12-0416.09
Miami-Dade County, Florida, 25Apr17
- Casement window, large missile
Notice of Acceptance (NOA) #12-0416.06
Miami-Dade County, Florida, 25Apr17
- Casement window, small missile
Notice of Acceptance (NOA) #12-0416.08

1. All window dimensions are frame dimensions +/- 1/2".
2. Sizes listed are maximum allowable at load indicated. If no load is listed for a given size, the size exceeds allowable and is not acceptable.
3. Casement size maximum is 4'-0" wide by 6'-0" high with allowable design pressures of +80 psf and -90 psf.

SUPERWALL™

Wausau's 6250 and 8250 Series SuperWall systems have been tested to meet the large missile requirements of ASTM 1996 for Wind Zone 1, including module sizes up to 5'-6" x 10'-1".
