Wausau names Brad Glauser as architectural sales representative serving Washington, Oregon and northern Idaho

Wausau, Wis. (June 2011) – Brad Glauser has joined Wausau Window and Wall Systems as its architectural sales representative serving the Northwestern states of Washington, Oregon and northern Idaho.

“Wausau has the high-performance products and experience to address the needs of this region,” says Glauser. “States in the northwestern U.S. are on the leading edge of green building and sustainable design. Energy-efficient building improvements and renovations present new opportunities for existing buildings. Specific to Seattle, Wausau offers NFRC-labeled products to meet one of the most stringent city codes in the U.S.”

Glauser works closely with the area’s building owners, architects, general contractors and glazing contractors and is based in Everett, Wash. Most recently, he worked as a territory and project manager for Pacific Aluminum Company/Pac Glazing Solutions in Woodinville, Wash. He previously worked in Utah with Weather Master Products and Almega Commercial Construction, Inc.

In addition to architectural sales, Glauser has more than 10 years of industry experience in executive management, estimating, purchasing and project management, including buildings seeking certification under such programs as the U.S. Green Building Council’s (USGBC’s) LEED® Green Building Rating System™. He will represent Wausau at USGBC events, as well as the Building Owners Managers Association (BOMA), the Construction Specifications Institute (CSI) and other industry association.

Along with his involvement and professional development with these organizations, Glauser is licensed as a general contractor in Utah, certified in building envelope waterproofing through Tyvek and completed commercial glass and glazing coursework through the American Institute of Architects (AIA) and Viracon, Inc. He also has studied at Utah’s Dixie State College in St. George, and at the University of Utah in Salt Lake City.
